Work Samples

The following pages contain fictional sample formats to show how I organize routine HR, data entry, and administrative information.

1. Data Entry & Record Management

Example: A structured register for entering and tracking service requests. Sample names and figures are fictional.

Ref. No.	Date	Record Type	Status	Follow-up
SR-001	04-Nov-2026	Profile update	Completed	Filed
SR-002	05-Nov-2026	Document request	In progress	Verify details
SR-003	06-Nov-2026	Data correction	Pending	Awaiting reply
SR-004	07-Nov-2026	Record filing	Completed	Archived

My approach

• Enter information consistently using agreed formats.
• Check required fields and remove duplicate entries.
• Keep status and follow-up notes clear.
• Protect confidential information and share records only with authorized people.

2. Attendance & Leave Tracking

Example: Monthly attendance summary. This is a demonstration layout, not an actual employee record.

Employee ID	Working Days	Present	Leave	Absent
EMP-101	22	20	2	0
EMP-102	22	19	1	2
EMP-103	22	21	1	0

Useful checks: confirm leave approvals, flag missing attendance entries, and reconcile totals before submitting a monthly summary.

3. HR Records & Recruitment Coordination

Example: A simple recruitment tracker to monitor candidate progress. All sample entries are fictional.

Candidate Ref.	Role	Stage	Next Action
CAN-001	Office Assistant	CV reviewed	Schedule call

CAN-003	HR Intern	Shortlisted	Confirm availability

HR support tasks I can assist with

• Maintaining employee files and updating staff information.
• Organizing attendance, leave, and onboarding documents.
• Coordinating interview schedules and candidate communication.
• Preparing and maintaining checklists and trackers.
• Handling employee information with confidentiality.

4. Administrative & Expense Report
